PROFILE

Results-driven software developer with a strong background in MERN stack and React Native, skilled in Blender, Spline, Figma, and Framer for UI/UX design. Proficient in Python, Java, C, and SQL, with a passion for creating seamless digital experiences.

WORK EXPERIENCE

The Good Game Theory

FEB 2025 - PRESENT

UI/UX Intern

Designed intuitive, user-centric interfaces for AI-driven educational games.

Conducted user research to optimize UI/UX and enhance accessibility and engagement.

Oasis InfoByte

FEB 2025 - MAR 2025

Web Developer Intern

Developed responsive, user-friendly websites for AI-driven educational platforms.

Implemented front-end technologies to optimize site performance, accessibility, and user engagement.

PROJECTS

Globepath (Jan 2025)

React Native, Tailwind CSS, Gemini, Firebase

Developed an AI-powered travel planner app that provides personalized travel itineraries, helping users plan trips efficiently with real-time data and seamless integration.

Object Detection (May 2024 - Feb 2025)

Python, Computer Vision

Built an object detection system capable of identifying and classifying up to two objects in real-time, utilizing advanced computer vision techniques for accurate results.

Chattie (Apr 2024 - Present)

MERN Stack, Material-UI, Tailwind CSS

Developed a cutting-edge chat app with full stack JavaScript, offering seamless user-to-user communication, responsive designs, and rapid customization.

Employee Management System (May 2024)

JavaFX, Java, SQL

Developed a simple CRUD application for efficient data management with a user-friendly interface.
